CLEANING AND MAINTAINCE

In order to preserve this outdoor furniture over time we recommend:

For aluminium:
Use a soft cloth with water* and neutral soap. Cleaning agents must not contain solvents or bleaching agents. Metal brushes or scrapers of any kind are not suitable for cleaning.

For Marble:
Use a soft cloth with water* and neutral soap. Cleaning agents must not contain solvents or bleaching agents. Metal brushes or scrapers of any kind are not suitable for cleaning.
A special protective agent is applied to the marble in order to prevent the pollution of marble. It is important to know that all protective agents cannot prevent pollution 100% for a long time, so once the source of pollution is spilled (oil, tea, coffee, cola, soy sauce, ink, etc.) on the marble, it must be removed immediately to prevent it from penetrating into the pores of the marble.

Maintenance guidelines:
To ensure the durability of the product clean frequently with a soft cloth. Clean surfaces with mild pH neutral dish soap or specially formulated marble cleaner. Thoroughly rinse and dry the surface with clean, clear water after washing.
To ensure long-term use, during the winter months, we recommend storing indoors.

To ensure long-term use, during the winter months, we recommend storing indoors.

*water should not be over 40 °C

BENEFITS

Construction

Aluminuim Construction | Light Weight | Sun Proof Anti Ultraviolet | Corrosion Free | Long Lasting | Scratch resistance | High color & texture stability | Water-resistant surface

Marble

Natural stone | UV Protect UV Resistant
